# Special features

### Flexible Anti-Perforation midsole

Extremely flexible anti-perforation midsole made of ceramic coated fibres, light, antimagnetic, thermally insulating.

### RECYCLED MATERIALS USED

#### Recycled materials used

These products incorporate recycled and sustainable materials in the construction of the footwear.

### BreathActive

Multi-layer functional lining for increased breathability through micro-channel system, rapid absorption and release of moisture.

### Puma Power Plate

The POWER PLATE supports the stability of the entire foot, increases the energy return effect of the IMPULSE.FOAM® midsole and supports with every step the natural rolling movement of the foot.

### Anti-fatigue technology

The innovative IMPULSE.FOAM® anti-fatigue midsole reacts to each step with an energy impulse. It provides maximum cushioning, excellent stability and long lasting comfort.

### EFFECT.FOAM

Provides excellent cushioning, up to 60% energy return and 47% less impact on bones and joints providing all day comfort and stability.

### PUMA EVA cushioning pad

The EVA cushioning pad integrated in the heel area ensures optimum shock absorption during ground contact.

### PUMA gelCELL

Soft cushioning system directly embedded in the heel, providing essential shock absorption plus energy return.

### PUMA idCell

The idCell element embedded in the heel area consists of a very soft sponge EVA midsole which absorbs impacts and shocks when the heel strikes the ground.
